Volume Contents

NUMBER 1 JANUARY–MARCH 1984

Efficient Algorithms for the Processing of Multidimensional Spectroscopic Data Arrays: I. D. Grachev, M. Kh. Salakhov and I. S. Fishman 1

SIRIUS—An Efficient Infrared Spectra Search System: K. Tanabe, J. Hiraishi, S. Saeki, I. Suzuki and M. Tasumi 13

A Comparison Between Kawata–Minami and Savitzky–Golay Smoothing Methods with Raman Spectral Data: K. Tanabe and J. Hiraishi. 17

A Microcomputer Data Acquisition System for Mass Spectrometry: D. M. Desiderio, J. S. Laughter, I. Katakuse, M. Kai and J. Trimble. 21

A Microcomputer-controlled Photoelectron Spectrometer for the Detection of Short-lived Gas Phase Intermediates: O. Grabandt, H. G. Muller and C. A. de Lange 33

Control of a Novel Ion-translational-energy Spectrometer Using an Apple Microcomputer: G. W. Trott, F. M. Harris, M. S. Thacker, S. Singh and J. H. Beynon 43

Book Review 51

Announcement 51

NUMBER 2 APRIL–JUNE 1984

Application of Computers to Vibronic Spectra: A. Bartecki and J. Myrczek 53

Automatic Peak Assignments for *in vivo* ^{31}P NMR Spectra: C. Dumoulin 61

Optimization of Parameters for Fourier Self-deconvolution: 2—Band Multiplets: W.-J. Yang and P. R. Griffiths 69

A Programmable Spectrometer Interface Based on a Commercial Microcomputer System: L. Van Haverbeke, H. Duijvewaardt and M. A. Herman 75

New Approach to Increased Dynamic Range in Fourier Transform Infrared Spectrometry: G. M. Brissey and C. L. Wilkins 85

Microprocessor Synchronization of a Multichannel Analyser with a Monochromator: M. Carleer and J. P. Walgraeve 91

NUMBER 3 JULY–SEPTEMBER 1984

COSMOS—Combined Search System for Molecular Spectra: K. Tanabe, J. Hiraishi, T. Tamura, O. Yamamoto, M. Yanagisawa and N. Wasada 97

Software System for Calculation and Manipulation of Spectral Line Parameters: O. K. Voitsekhovskaya, Yu. S. Makushkin, A. I. Popkov, V. P. Rudenko, N. N. Trifonova, N. E. Yakovlev, O. N. Sulakshina and V. N. Cherepanov 101

Automated Infrared Spectrometer for Measurement of Surface Electromagnetic Waves: G. N. Zhizhin, A. I. Kuryatnikov, G. Yu. Lopatovskii, M. A. Moskalova, V. I. Silin, V. V. Tkachev and V. A. Yakovlev 107

Automated Spectral Data Processing: C. L. Dumoulin and J. E. Harrington 113

The Regularized Algorithm of Local Emission Reconstruction in the Spectroscopic Study of an Optically Thin Plasma of Arbitrary Shape: M. Kh. Salakhov, I. D. Grachev, R. Z. Latipov and I. S. Fishman 117

On-line Processing of Densitometer Readings of Photographic Emulsion Plates for Spectrochemical Analysis using a Desk-top Computer: M. F. Guns 125

Computer Studies on the Composition and Electronic Spectra of Separate Complex Species in Solution: A. Bartecki and Z. Staszak 129

NUMBER 4 OCTOBER–DECEMBER 1984

Using a Hewlett–Packard Minicomputer for the Processing of Tunable Diode Laser Spectra: G. Blanquet and J. Walrand 135

A Multibus/IEEE-796 Compatible Interface Board for Instrumentation Control and Data Acquisition: D. Ricci and D. Guidarini 141

Several Alternative Implementations of a Numerical Method for Extracting Single-component Mass Spectra from GC–MS Data Arrays: M. D. King 149

Photokinetic Evaluation by Microprocessor Controlled Fluorescence Data Acquisition: G. Gauglitz and R. Goes 159

Aids for Building and Maintaining Speciality In-house Mass Spectral Libraries: D. F. Magin and B. W. Good 167
